Abra GameLoop y busque "WeCatch - Radar & Map", busque WeCatch - Radar & Map en los resultados de bsqueda y haga clic en "Instalar".3. Disfruta jugando WeCatch - Radar & Map en GameLoop.WeCatch es una aplicacin que nos permite capturar ms y mejores Pokmon en Pokmon Go. A travs de un mapa, podemos buscar en cualquier parte del mundo. Antes de realizar la bsqueda, podemos aplicar un filtro en funcin del Pokmon concreto o de la generacin que queramos buscar. Tras seleccionarlos, podemos ir al mapa y pulsar en el botn de actualizar para que salga la ubicacin de todos esos Pokmon en el mapa.Una vez aparecen en el mapa, podemos elegir la opcin de ir fsicamente a ese sitio o utilizar otras tcnicas para simular que estamos en otra ubicacin. Si un Pokmon aparece con algo de transparencia, eso significa que desaparecer pronto. Si pulsamos sobre un Pokmon, podremos ver el nombre, las coordenadas en las que se encuentra, la climatologa de esa zona, y el tiempo que queda para que desaparezca.Publicidad Elimina anuncios y mucho ms con TurboCuando hayamos elegido el Pokmon y la zona en la que se encuentra, podremos copiar las coordenadas e ir all directamente. Tras ello, ya podremos capturarlo. Adems de poder atrapar todo tipo de Pokmon, en WeCatch, tambin podemos ver los tipos de gimnasios que hay por el mapa, as como conocer en cules hay Pokmon especiales.Si quieres ser ms eficiente en tus capturas en Pokmon Go, descargar el APK de WeCatch es una opcin excelente. WeCatch is a useful tool which powered by Pokmon GO community (Pokmon GO fans and lovers). The idea is to bring people together and share information immediately via the App. The followings are the main features: 1. Receive push notifications of rare Pokmons location (Must login and filter first). 2. Search Pokmon, Gym, Raids, Pokestop around map area in real time and allow users to filter. 3. Track the closest rare Pokmon and Raids. 4. Easily share the Pokmon you found with your friends.Thank you so much for your support! If you like our app, please spend some time to leave a 5 start review.Our Facebook Page: WeCatch - Radar & Map is in no way affiliate with or associated with the Pokmon GO brand, Pokmon brand, Niantic or Nintendo. This app has been built by fans to support the game community. Oct 18, 2022 Version 1.6.3 * New Raid Support* Bug fixes This app is very helpful and very very handy. I love it and use it a lot. But there are some things I wish were implemented into the app. Such as giving the direct cornets of the Pokmon Instead of the address because sometimes it doesnt give the correct area. Another thing that would be great is shiny spawn. IV and raids are nice but if there was shiny spawns that would add a whole new level to this app. Another things is that some Pokmon listed on the app dont spawn in the wild. What would be great is to only have Pokmon listed that spawn in the wild. When I fist got this app I was only expecting a map of poke stops and gyms in my area but that wasnt the case it totally blew my mind to see all the other features with the map. One of my favorite features was the gym details given like the color of gym and type of Pokmon in that gym, it even gave the IV and CP of that Pokmon and more which is awesome but the main problem is the fact that it is not vary up to date or has a completely different team in it, maybe a refresh gym button can fix the issue? So this is the only IOS Pokmon finder that isnt reliant on crowd sourcing so its better than nothing. I work downtown and it works just fine there. But it doesnt show ANY Pokmon in the suburbs. I dont know how this app is getting its information; if it needs a higher concentration of users to work properly but if it was accurate on this side of town as well as downtown, Id have zero complaints. Learn MorePokmon GO es uno de los juego mas populares de hoy en da y no es novedad que haya herramientas para ayudarnos en la bsqueda de pokemons. Es por eso que hoy te mostrare Wecatch radar pokemon mundial para encontrar los mejores pokemones.Wecatch te muestra miniaturas de los pokemonesPor si ya has probado esta wecatch antes o no debes saber que al principio no es una app muy fcil de manejar y suele ser algo engorroso el poder buscar pokemons con ella.Mas sin embargo pensamos en todo esto (por que tambien nos paso) y despus de estudiarla un rato vimos las mejores maneras de su funcionamiento.Para empezar la app no esta en la playstore pero la tenemos para ti en nuestra seccin de descargas pokemon aqui Todo esto lo juntamos en un vdeo tutorial en nuestro CANAL DE YOUTUBE SUSCRIBETE! el cual podrs ver aqu abajo Wecatch es un radar que se alimenta de las bases de datos actuales de muchos mapas de zonas de alta tasa de aparicin pokemon como New York o Taiwan por lo que el mapa en la app puede no cargar los datos de todos ladosPero ese no es un gran problema ya que cuenta con radares en tiempo real que te pasan coordenadas mundiales de pokemons iv100 o de otras caractersticas as que siempre obtendrs lo que buscasHonestamente si se recomienda este radar para buscar los pokemons favoritos o lugares para farmear ya que ademas te muestra los resultados de pokeparadas, gimnasios cerca de ti y dems detalles Wecatch is one of the most popular pokemon go radars worldwide which allows you to search for your favorite Pokmon all over the worldBut thats not all since it also allows you to use the radar to find poke stops with the missions you want, specific raids and special missions that is also easy to use.Wecatch is an apparently Asian application which is updated from time to time as there are updates in pokemon go as in this case version 4.3.9 wasThis version was recently added which is the latest and you can download from the following link:it is always important to have wecatch updated since if you do not have the latest version installed it is very likely that the app will not work as it shouldRemember that it is completely free and you can download it and start using it right away so its usability is very good.The generation VII pokemon are already in the apps search library as well as the raids and mega-incursions for when they are needed.So dont think about it anymore and go download it because it will be very helpfulThis app works only for Android systems and is recommended to complement any other fly system such as PGSHARPRemember that you can also find the POKEMON NEST LOCATIONS HERE WeCatch is an app that allows you to catch more and better Pokmon in Pokmon Go. Via a map, you can search anywhere in the world. Before performing the search, you can filter according to the specific Pokmon or generation you want to search for. After selecting them, you can go to the map and tap on the update button to display the location of all those Pokmon on the map.Once they appear on the map, you can choose the option to physically go to that site or use other techniques to simulate that you are in another location. If a Pokmon appears somewhat transparent, that means it will disappear soon. If you tap on a Pokmon, you can see its name, the coordinates where it is located, the weather in that area, and the time remaining until it disappears.Advertisement Remove ads and more with TurboOnce you have chosen the Pokmon and the area where it is located, you can copy the coordinates and go there directly. After that, you will be able to capture it. In addition to catching all types of Pokmon, in WeCatch, you can also see the kinds of gyms on the map, as well as know which ones have special Pokmon.If you want to be more efficient in your Pokmon Go catches, downloading the WeCatch APK is an excellent option.
