It increases the contrast between the brightest whites and the darkest blacks a TV can produce. To do a good job with HDR video, a TV needs to get bright enough to display brighter, more colorful images with greater contrast and a wider array of colors, much closer to what we see in real life.For HDR performance, we measure the TVs peak brightness using a \$40,000 Photo Research PR-740 spectroradiometer (also used for fine colors and deep black measurements) and industry-standard and proprietary test patterns. We then evaluate the TVs HDR performance with very dark and very bright scenes and video clips that feature an extended range of colors.We evaluate picture quality for clarity, color accuracy, and contrast at various horizontal and vertical viewing angles. Motion-blur tests, done at various speeds, evaluate how well the TV can produce a blur-free image during motion scenes.Sound quality is evaluated using the TVs built-in speakers in subjective testing by a trained listening panel, with support from audio test equipment. We listen for the overall quality of sound, the depth of bass, effective volume levels, and audible distortion during dialogue, music, and movie soundtracks. (Many TVs have unimpressive sound in comparison to their image quality. You can address that by adding a soundbar.)The versatility score is a measure of a TVs useful features, including access to streaming services, the ability to work with digital voice assistants, the number of HDMI and USB inputs, and support for various media.Finally, Consumer Reports also includes data privacy and security scores for all the TVs we test. Now that TVs routinely connect to the Internet, data privacy and security have become concerns for consumers.Consumer Reports evaluates the various ways TV brands collect, use, and share consumer data, how well they protect it, and how transparent they are about their data practices. We encourage TV makers to ship their sets to consumers with the optimal privacy settings turned on by default. You can adjust the settings yourself. Transform your living room into a captivating cinematic experience with the latest TVs and home theater systems. Discover the ideal combination of technology and entertainment at Target that will enhance your viewing pleasure like never before. Dive into the world of home theaters and explore Targets wide range of products to create the ultimate setup for your needs.Unparalleled Picture Quality: Immerse Yourself in Stunning VisualsWhen it comes to selecting a TV, picture quality is paramount. Elevate your audio experience with our range of sound bars, surround sound systems, and immersive Dolby Atmos setups. Get ready to be immersed in the heart-pounding action as you feel the thunderous booms, hear crisp dialogue, and notice even the subtlest audio details. Say goodbye to flat sound and say hello to an audio experience that matches the stunning visuals, taking your home entertainment to new heights.Smart Features: Connect and Stream SeamlesslyIn the age of smart technology, your TV can be much more than just a display. Browse through Targets range of smart TVs that allow you to access a world of entertainment right at your fingertips. Stream your favorite shows and movies from popular services like Netflix, Amazon Prime Video, and Disney+ in Blu Ray quality. Browse the web, connect with your favorite apps, and enjoy the convenience of voice control features that make operating your TV a breeze.Create Your Ideal Home Theater SetupBuilding the perfect home theater involves more than just a TV and sound system. Its about creating an immersive environment that brings the magic of the movies into your living room. Consider adding comfortable seating, ambient lighting, and even acoustic treatments to optimize the audio experience. Target Team Members can assist you in selecting the right accessories, subwoofers and amplifiers to enhance your home theater setup, ensuring every detail is taken care of for an unforgettable entertainment space.FAQ:Q: What size TV should I choose for my living room?A: The size of the TV depends on the viewing distance and personal preference. Aim for a screen size that is proportional to your room. For example, for a viewing distance of 6 to 9 feet, a 55 to 65-inch TV is suitable. Larger screens can provide a more immersive experience if you have the space and desire.Q: Are OLED or QLED TVs better?A: OLED and QLED TVs offer exceptional picture quality, but they have different underlying technologies. OLED TVs provide perfect blacks and infinite contrast, making them ideal for dark room viewing. QLED TVs excel in brightness and color accuracy, making them great for well-lit rooms. Consider your viewing environment and preferences to determine which technology suits you best.Q: Do I need a separate receiver for my home theater system?A: It depends on the system you choose. Some home theater systems come with built-in receivers, while others require a separate receiver for audio processing. Ensure compatibility and check the specifications of the system youre interested in for guidance.Upgrade your home entertainment today and create a home theater setup that will redefine your viewing experience. Visit Target or explore arget.com to discover the perfect combination of TVs, audio systems, and accessories that suit your needs. Search America's online TV listings guide. Any time. Any channel. Any TV show. America's leading online TV listings & streaming guide 2025 ON TV TONIGHT | Legal Notices | Privacy Policy Get ready to dive into a world of amazing TVs that will elevate your entertainment experience. Whether youre in the market for large-screen TVs, stunning OLED displays, smart TVs, HDR technology, LED TVs, TCL models, UHD resolution, quantum dot enhancements, sound bars, QLED TVs, Hisense, high refresh rates, customizable backlighting, Roku TVs, exceptional picture quality, or a variety of TV sizes measured in inches, Target has just what you need.Lets start with screen size. Targets selection includes TVs of various sizes, from mini LED models to those grand, room-filling screens with HDR (High Dynamic Range) that transform your living room into a personal cinema. Looking for an immersive cinematic adventure? Explore Targets range of TVs available in different inch sizes that bring the big-screen experience right into your home.Now, lets talk about the latest and greatest in display technology. Most TVs on sale today from TCL or other brands are LED TVs that are HDR compatible and with backlighting technology. OLED TVs have become incredibly popular for a reason. They offer unparalleled picture quality with their deep blacks and vibrant colors, ensuring your favorite shows and movies come to life in stunning detail. And if youre seeking a HDTV thats not just smart but super smart, our lineup of smart TVs is sure to impress. With built-in streaming services like Roku TV, accessing your favorite content is a breeze. Plus, many of the smart TVs are compatible with popular streaming services, allowing you to enjoy endless hours of entertainment hassle-free.When it comes to picture quality, Targets got you covered. Targets HDTVs support HDR, providing enhanced contrast and a broader color range for a more immersive viewing experience. For an even more captivating visual feast, explore the QLED TVs featuring Quantum Dot technology. These TVs deliver bright and accurate colors, making every scene pop with brilliance.Looking to enhance your audio experience? Consider adding a sound bar to your setup. Targets selection of sound bars will take your TVs sound quality to new heights, allowing you to enjoy rich and immersive audio that complements the stunning visuals.Target offer TVs from brands such Samsung, TCL and Hisense, known for their exceptional quality and reliability. Shop with confidence, knowing that youre getting the best of the best. And if youre seeking the cutting edge of display technology, explore our TVs featuring Mini LED technology. With precise backlighting, they offer exceptional contrast and picture quality for a truly captivating viewing experience.Dont forget to consider the refresh rate of your new TV. A higher refresh rate ensures smoother motion, making it perfect for sports enthusiasts and fans of action-packed movies. Look out for TVs with high refresh rates to truly immerse yourself in the on-screen excitement.Targets aim to help you find the perfect TV that suits your needs and preferences. So, browse Target.coms TV section and explore the wide range of options. Your next home entertainment upgrade is just a visit away!
