Fuji Photo Film Co., Ltd. was established in 1934 as a subsidiary of Daicel producing photographic films. In the 1940s, Fuji Photo entered the optical glasses, lenses and
 equipment markets. In 1962, Fuji Photo and UK-based Rank Xerox Limited (now Xerox Limited) launched Fuji Xerox Co., Ltd. through a joint venture.[citation needed]From the mid-1950s, Fuji Photo began establishing overseas sales bases. In the 1980s, the company expanded its production and other operations internationally. During this period,
Fuji Photo developed digital technologies for its photography, medical, and printing sectors. This led to the invention of computed radiography, including reducing radiation exposure for both technicians and patients. Fujifilm's systems were marketed and sold under the
FCR brand.[12]Like its rival Eastman Kodak which dominated in the US, Fuji Photo enjoyed a longtime near-monopoly on camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film, and establishing a film factory in the US.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film, and establishing a film factory in the US.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film, and establishing a film factory in the US.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film, and establishing a film factory in the US.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics, offering cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics (heaper cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming one of the title sponsors of the 1984 Los Angeles Olympics (heaper cheaper cheaper camera film in Japan.[citation needed] Fuji increased market share in the US by becoming the title sponsors of the 1984 Los Angel

performance in the Japanese market was a direct result of unfair practices adopted by Fuji. The complaint was lodged by the US with the World Trade Organization. On January 30, 1998, the WTO announced a "sweeping rejection of Kodak's complaints" about the film market in Japan. [14][15]In March 2006, Noritsu and Fuji announced a strategic
 alliance for Noritsu to manufacture all of Fuji's photofinishing hardware, such as mini labs. Each company produces its own software for the mini labs. Fujifilm and Fuji Xerox would become subsidiaries of the holding company. A
representative of the company reconfirmed its commitment to film, which accounts for 3% of sales.[17]On January 31, 2018, Fujifilm announced that it would acquire a 50.1% controlling stake in Xerox for US$6.1 billion, which will be amalgamated into its existing Fuji Xerox business.[18][19][20] The deal was subsequently dropped after intervention
by activist investors Carl Icahn and Darwin Deason.[21] In late 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[21]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox.[22]In December 2019, Fujifilm announced its acquisition of Xerox's 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xerox 25% stake in the 57-year-old joint venture, Fuji Xero

After the dissolution of their partnership in 2019,
 Fujifilm made it a wholly owned subsidiary. In January 2020, the corporate name change was announced, from Fuji Xerox to Fujifilm Business Innovation Corporation, effective on April 1, 2021.[26]Fujifilm bought Sericol Ltd., a UK-based printing ink company specializing in screen, narrow web, and digital print technologies in March 2005.
