Fundamentals of Nursing, 9th Edition by Patricia Ann Potter, Anne Griffin Perry, Patricia Stockert, and Amy Hall provides a comprehensive guide to nursing, covering critical thinking, evidence-based practice, nursing theory, and clinical care in various settings. The text includes step-by-step guidelines for essential skills and procedures, as well as case studies demonstrating how to apply concepts to real-world situations. You can access all features on both desktop and tablet devices. eBooks enable you to search for specific text and highlight it, as well as add personal notes directly within the book. Your purchase is intended for your personal use only, and you should not modify, copy, or share the content with anyone else. This updated 4th edition addresses current challenges faced by healthcare professionals and management experts. The author uses case studies and examples to provide students with a deeper understanding of nursing as a profession. Nursing Dynamics meets the curriculum requirements for basic and post-basic registration with the South African nursing council. It covers topics such as ethos, professional practice, unit management, education, and interpersonal skills, making it suitable for practitioners undergoing diploma or degree-level training. The book also caters to post-registration courses that integrate healthcare dynamics into other areas of study. This edition builds upon the success of its first publication in 1996, solidifying Marie Muller's Nursing Dynamics as an essential resource for nursing programs. It has expanded to include all managers in healthcare service management and broadened its focus on governance, decision-making, financial management, quality management, and continuing professional development. A new feature is the integration of digital elements, including QR codes, online support materials, and a digital portfolio for evidence. Each chapter concludes with practical exercises following the Head-Heart-Hands model, which covers knowledge application, ethical considerations, and hands-on implementation.
