Each week, your child will read two engaging 6th-grade reading comprehension selections, both fiction and non-fiction. We've chosen the best reading selections that will open your son or daughter's world of reading for comprehension. Your child will learn how to talk about and summarize the stories they have read. One of the easiest ways to improve reading for comprehension is to take notes from what you read. Your child will learn to take notes from what they have read and use those notes later. One of the important goals for 6th-grade reading comprehension is to be able to summarize a selection, explain the main idea, and use supporting details. Your 6th-grade reader will get plenty of experience with this. They will use our custom fill-in-the-blank note-taking forms which make it easy to take notes and organize ideas. This method teaches your 6th grader how to take meaningful notes. Your sixth-grader will become a better thinker as they improve their note-taking and writing skills. Recalling information is typically quite easy when you answer the reading comprehension immediately following reading the selection. The key is, can you retain the information for a couple of days? We want to build long term reading with comprehension skills. In Scholar Within, your child will answer questions to the selections they have read in the program a day or two later. Your child will learn to remember and recall what they have read by reviewing notes and writing summaries of them. Your child learns the process they will use for years to come to have success in school and in life. Vocabulary and spelling become even more important in the sixth grade. Your sixth-grader will learn how to spell by spelling patterns through our interactive video lessons. Your kids will learn and practice the phonetic spelling patterns of English through each lesson, spelling activity worksheets, puzzles, and games. Each week, your child will learn to spell ten new words according to their phonetic spelling patterns. Reading fluency has a direct impact on reading comprehension. When you read fluently and automatically you have a greater ability to comprehend what you have read. In fact, reading fluency training is one of the most important strategies used to build your child's success with reading. This is your child's ability to read with speed and accuracy without conscious attention to the mechanics of reading. This is a critical skill as your child moves into the upper grades and the reading material becomes longer and more complicated. Our research-proven reading fluency drills work on training your eyes to move more efficiently and smoothly left to right. They also improve your kids' visual processing speed, or how fast they can retrieve and process what they see. You and your kids will love seeing their improvement each day. Another important 6th-grade reading for comprehension goal is to expand vocabulary. Each week your child will play a card game that will work on their word identification skills or comprehension and vocabulary skills. The card games are specifically designed to improve your reading comprehension through expanding vocabulary and gaining a greater understanding of both words and word structure. Both of these skills improve your overall ability to read for comprehension. Your child will love these games and want to play them over and over again. Your child will use fill-in-the-blank daily to-do worksheets and planning calendars to schedule out their days. Your child will decide when they will do certain activities, and they will estimate how long each activity will take. After the activity is completed, they will reflect on how long it actually took and will start to build their time awareness and planning skills. Your child will strengthen their working memory, flexible thinking, and organization skills. Every component of our reading program is research-based and is specifically designed to boost your child's reading skills. The program has been created by learning expert and board-certified educational therapist Bonnie Terry, M.Ed. She put together her 35+ years of working hands-on with children of all learning styles and abilities into this step-by-step program with custom-designed methods that you and your kids will see results each week. Your child will gain confidence and be excited about reading. Your child will make substantial gains with these effective research-based techniques. Your child will be able to complete their assignments more quickly and easily. They will gain confidence and develop a lifelong love of reading and learning. Your child will do a variety of activities that teach and strengthen all of these skills. Your child will love doing the activities in the program and will want to do them again and again. And, the program also gives you the best 6th-grade reading list for extra reading practice. Only logged in customers in the United States are allowed to write product reviews. Reserve your spot for the best homeschool reading program. The availability of this reading program is limited. Reserve Your Spot Reading apps can encourage kids to do more reading. Many are focused on phonics, but reading comprehension apps especially can help children practice important foundational skills. Learning to read has two main components: decoding and comprehension. Decoding involves the phonics skills: letter sounds, letter combinations, and putting it all together to make words. Comprehension is a much less straightforward concept. At its core, comprehension means understanding what you are reading. But teaching that and measuring it can be complex. These reading comprehension apps are great tools to help children practice those skills. They're great tools for teachers and families to promote strong reading comprehension. Epic! offers an immense library of high-quality published books. Kids can have books read aloud to them, and take quizzes to show what they learned. The website and app are free for teachers and librarians. This app has fictional and nonfiction passages for kids in grades 2-8. Each passage has questions for readers to answer to show understanding. Created by Lavar Burton's "Reading is Fundamental," this app has an interactive library. Hundreds of books are available to read or listen to, and Burton himself is featured in video adventures. Long ago this company was called "Living Books," and kids could load these interactive storybooks from a CD-ROM. Today, it's available as an app, but still offers the same fun, interactive elements. Popular series like Berenstain Bears and Arthur are available. Hoopla is a digital platform for books and other media. It's especially great for children's books because the ereader makes illustrations look amazing. The library has a robust nonfiction selection for kids. It's likely that your library offers Hoopla for free, so check that out. Kids learn best by listening all the way through middle school. Audiobooks can help kids retain the stories they're reading. Audible is the best source for audiobooks, and Audible Stories is designed specifically for kids. RAZ Kids is a leveled reading program designed to move kids from one reading level to another. Learning A-Z provides its own library of leveled books. Each book has a comprehension quiz at the end. In order to comprehend what they are reading, kids need background knowledge. These apps aim to help kids learn about science, social studies, and more. When they turn to literature and nonfiction books, they'll have context for what they are reading. Brain POP offers articles and games in science, social studies, and the arts to help kids build a strong knowledge base. Interactive games and maker activities encourage kids to create projects from what they've learned. This is news written with young readers in mind. Articles are concise and provide context for kids to understand what they are reading. To motivate kids to retain what they read, Xyza offers weekly news trivia through Newsicle. Readers can connect on a phone, tablet, laptop, or even get a print publication. Nat Geo Kids offers games, videos, and books for kids to learn about science. Whether they're interested in animals, weather, or how things work, there's something for every kid. This interactive atlas lets kids fly around the world, stopping wherever they please. Kids will learn about the culture and geography of countries and cities around the globe. The map is covered in illustrations of people, monuments, and natural wonders, and kids can touch them to learn more. Are you looking for apps, tools, and resources that you can use with your 6th-grade students? If so, we have you covered. Check out our list below. Let us know if there are any that we missed. 7 Speed Reading- This app can help you become a proficient reader in the English language while eliminating old habits that hold you back. With 7 Speed Reading, students can learn to recognize large clusters of words and read without first vocalizing in their heads StudySync - StudySync offers a comprehensive, technology-driven English Language Arts curriculum for grades 6-12. The curriculum integrates reading and writing with embedded skill lessons to build foundational knowledge and improve critical thinking, comprehension, and inquiry skills. Teachers have the option to use StudySync as a completely digital curriculum or turn to the printable options. With the belief that all students deserve equal access to education, StudySync offers tons of differentiation options for various student needs, including English Language Learner segments, extensive use of video and audio components, and repeated readings. Extended writing projects use explicit instruction along with self, peer, and teacher assessment to encourage deep understanding and future skill application. Whooo's Reading - The goal of Whooo's Reading is accelerated reading comprehension and improved writing skills. By using open-ended questions instead of the standard true/false and multiple-choice style, students are required to think independently about texts. The Whooo's Reading program automatically reminds students to improve their writing by asking them to cite evidence or answer all the parts of a question. Teachers can monitor student's reading with automatic quiz results, graded by the Whooo's Reading app, available in the teacher dashboard. To increase student motivation, students earn Wisdom Coins for reading and writing. These can be spent on accessories and items for their Owlvators (owl avatars). Word Hippo - Word Hippo is a one-stop website for all your word needs. It includes a dictionary, thesaurus, synonyms, antonyms, rhymes, example sentences, translations into over 80 languages, the ability to find words of different lengths based on specific letters or blends, the ability to find words in different forms (plural, past tense, present tense, etc.), and the ability to hear pronunciations. Word Hippo is particularly useful for ELL students, during writing or literacy classes, or while playing a Scrabble-type game. Study Island - Study Island is an all-in-one practice website for students to work on literacy, math, science, and social studies skills. It is built specifically around state standards, so regardless of your school's location, you can rest assured that the content and practice provided on the website will align with your classroom teaching. Study Island is a great tool to use for high stakes testing preparation and provides real-time progress monitoring for teachers and parents. Beyond simple practice, Study Island can also be incorporated into classroom lessons for formative assessment and differentiation. It even allows teachers to import NWEA MAP assessment information for individual students and calculates a targeted learning path to fill in knowledge gaps! Power Math- Power Math is a perfect way to master elementary mathematics skills. Through digital flashcards, students will learn addition, subtraction, multiplication, and division. They can customize and edit these; however, they want to help them best learn. All flashcards will then be generated in random order for an extra challenge in studying. You can even zero in on a specific skill, such as dividing by three or subtracting by five. Parents and educators are encouraged to assist children with this app to promote learning, increase motivation, and praise correct answers. Vocab Ahead - Vocab Ahead is available as a website or an app. It is designed to help students in middle school and up to develop their vocabulary through the use of videos and flashcards. Each vocabulary word is linked to a picture and a specific definition. Vocab Ahead also has specific categories for SAT words, GRE words, and more. Quick Fractions- The goal of this app is to make fractions-related problems easy for anyone willing to solve them. This app is suitable for kids just starting with fractions, advanced students, and even adults looking for a challenge. The game uses four modes to keep users occupied and entertained as they try to solve the problems. The first mode is Equivalence in which users solve equivalence problems using fractions, percentages, and decimals. The second is Compare in which players compare fractions, percentages, and decimals. The third is Addition and subtraction, which involve proper and improper fractions as well as mixed numbers using mental arithmetic. The fourth mode is Multiplications and Division in which mental arithmetic is used to multiply and divide all forms of fractions. Khan Academy- Khan Academy has more than 40,000 interactive Common Core-aligned practice questions and above 10,000 videos and explanations in economics, history, math, and more. This is the best study app and thrive with this approach. 8. Reading Comprehension Price: \$1.99 Primary Audience: K-8 Idea: Comprehension is enforced through short passages with accompanying visuals, and persistent multiple-choice based assessment. Available grade levels from Kindergarten to early middle school. (The link above will take you to grades 2-3; see others in "More apps by..." area.) 9. Second Grade Reading Comprehension Price: \$2.99 Primary Audience: K-6 (all apps) Idea: A wide variety of stories that encourage comprehension by sheer opportunity for practice. Progress can be set to automatically forward to parents and teachers, and you can also create your own stories to use as well. 10. Reading Remedies Price: .99 Primary Audience: K-5 and SLP. Idea: Comprehension is addressed here by breaking the process of reading down into blends, word fluency, sight words, and then general recall, with suggested activities to improve general fluency. 11. Speech with Milo: Sequencing Price: \$2.99 Primary Audience: K-5 and SLP. Idea: Improve common narrative comprehension by improving fluency with sequencing (chronological, narrative, etc.). 12. BrainPOP Featured Movie Price: Free with in-app subscriptions from \$2-\$7 per month. Primary Audience: K-8 Idea: High-quality, animated content with assessment across content areas. 13. Enchanted Dictionary Price: \$1.99 Primary Audience: Grades 6-12 Idea: Improving general and academic vocabulary across content areas for improved fluency and comprehension. 14. Compare A Twist Price: \$1.99 Primary Audience: K-12 Idea: Use compare and contrast practice to improve fluency and comprehension, and general academic progress. Teachers can create their own lessons, comparing and contrasting everything from musical genres and cell types to geometric shapes and Shakespearean sonnets. 15. Reading Trainer Price: \$4.99 with in-app purchase "packs" Primary Audience: 6-12+ Idea: Improved reading speed for improved comprehension. Reading Prep Comprehension is a free advanced reading comprehension app on the App Store. It includes 12 stories, both fiction and nonfiction, aimed at older readers to improve comprehension skills. Designed for children and families, this self-paced app enables users to practice comprehension in or out of the classroom. Students can choose various genres, questions for each passage, and caters to different reading levels. Lou Adventures: Reading Game is an educational app designed to help young readers' improve their abilities in reading, comprehension, and speech. Developed with educational professionals, it offers immersive, fun gameplay to encourage reading enjoyment and English language proficiency. Reading Eggs offers lessons and activities to enhance reading comprehension. It includes e-books at the end of each lesson, with comprehension questions to monitor understanding. The app teaches various comprehension strategies, helping children access complex literature and nonfiction texts. It focuses on building fluency, vocabulary, and comprehension skills, and is particularly beneficial for older students preparing for standardized tests. Reading Eggs helps children improve their reading fluency with fun instructional online activities and ebooks. Readability Reading Tutor is an app for helping kids to improve their reading comprehension skills. Utilizing AI and speech recognition technology, it offers a tutor-like guided reading experience, accessible anytime and anywhere. The app focuses on developing and strengthening reading abilities, catering to beginners and advancing readers. Accomplish Reading is an app designed to improve children's reading comprehension. It presents sentences for children to read and then asks them to determine if the sentences make sense. Incorrect answers prompt re-reading, emphasizing the importance of this skill for comprehension. The app offers personalized feedback and progress reports for each user. Reading Trainer is a popular app focused on developing reading comprehension skills by improving reading fluency. It features 12 games and exercises aimed at increasing reading speed, coordinating eye movements, and enabling rapid recognition of letters and numbers. This app helps students meet grade level expectations in reading and makes the learning process enjoyable. Story Builder is a language-arts tool designed to improve children's skills in sentence formation, storytelling, and speaking. It is suitable for use in special needs classrooms and focuses on word choice, sentence structure, and organizational strategies. The app requires children to sequence their thoughts clearly, enhancing their ability to create coherent stories, even when dictating into the app. Rereading familiar, simple books gives your child practice at decoding words quickly, so they'll become more fluent in their reading comprehension. We have reviewed the best reading comprehension apps. Each of these apps helps children develop fundamental reading comprehension skills. Available for both iOS and Android, download a reading comprehension app today. You may also like:Reading Websites for Kids
